Mr. Bollinger is the Contractor Technical Lead to the Rehearsal Enabling Simulation Technologies (REST) program at the AFRL Warfighter Readiness Research Division.

Mr. Bollinger received his B.S. degree in Industrial Technology from Eastern New Mexico University in 1999 and soon began his simulation career at the Simulator Data Base Facility (SDBF) at Kirtland AFB. He joined the Database Generation System (DBGS) team at AFRL Mesa in 2003 where he created visual databases for the warfighter and REST program. Mr. Bollinger served 8 years as the visual database Team Lead on the A-10 Training Systems Support Center (TSSC) in Mesa, Arizona. He returned to the AFRL REST program at Wright-Patterson AFB in 2011 where he is actively involved in exploring emerging technologies for 3d content creation, data-correlation/ discovery/ reuse/standards, and correlated weather for Distributed Mission Operations (DMO).
